

Wire saw CSA-100 E

The mini automatic wire saw CSA-100 has been developed especially for medium and small separation cuts with diamond wires. Despite its considerably compact dimensions the machine provides a wire storage of up to 8 m wire. During development of the CSA-100 the 1-man-principle has consequently been implemented. The machine's single components do not exceed 21 kg.

storage rolls	8
wire in storage min/max	4,0/10,5 m
max. wire storage capacity	6,5 + 1,5* m
weight without motor	54 kg
operational weight without wire	75,5 kg
oil flow capacity feed	1 - 15 l/min
max. operating pressure feed	100 bar
dimensions L/W/H	1050/300/460 mm

* by displacing the machine on the mounting tube

order-No.	description
55 83	automatic wire saw with 2 mini swivel rolls and ground mounting foot, without drive motor
55 88	wire guard set with water collecting function
51 15	high-frequency electric motor, 18 kW, with 10 m cable
51 26	high-frequency universal control, 27 kW, 400 V/32 A
55 39	power pack for hydraulic feed; 230 V/50 Hz; 1,25 l/min; 0 - 95 bar
48 83	set of hoses 2-parts, 10 m long, for feed at drilling and wire sawing
51 54	control line HF-27.1 to HAG-2
51 11	universal control box with 10 m cable

order-No.	description
54 13	universa cremote ontrol box, alternatively to universal control box with cable
55 85	foot for mounting to wall or ground with mounting tube
55 86	precision swivel foot 360° with mounting tube
49 07	set of anchoring dowels M12 with impact nut
